PURE WATER
Technical Information

NUOVA FAR S.r.l. engineered a new PP taps line to satisfy the need of prevent any damage of the pure waters. This new line is made in RAL7032 colour, and allow that the water erogated goes in touch only with PP and never with metals or other contaminating materials. The open and close system is a PP ceramic headwork with 90° rotation and can work up to 6 bars pressure.

All the models made in PP are supplied with a G1/2” male threaded leg, and a female G1/4” thread that allow to screw inside a connector in PP for tube diameter external mm8 and internal mm6. The threaded leg also have a double flat Ch.17 for an easier closing of the fixing nut and for an easier assembly of the PP tube connector inside.

All the taps are also supplied with a PP rosetta, with laser printed the chemical abbreviation of the water following the EN13792 norm, as also the textual indication. All the taps are supplied with removable nozze G1/2”.
