Vacuum Pumps

Advantages of all chemical-resistant diaphragm vacuum pumps

- All components which come in contact with media are built from chemically resistant fluoropolymer
- The durable PTFE design guarantees an superior diaphragm lifespan
- The head cover and clamping disc have a stable core made of metal which offers unsurpassed long-term performance of your operational parameters
- The direct pump drive (without belt) is exceptionally quiet, creates a very low vibrational environment and reduces the need of wear and tear parts to a minimum
- The gas ballast valve has been optimized to prevent media condensing in the pump

RPM-Regulated Vacuum Pumps

- **Highest distillation rates possible and reducing process time by 30 %**
- **Stable distillation conditions account for solvent recovery up to 99 %**

**YOUR ADVANTAGES**

- Speed adjustment stops completely if vacuum is reached and runs intermittently at very low speed to hold vacuum constant
- Increased diaphragm performance life due to periods of non-operation
- Low energy consumption due to intermittent operation
- Significant noise and vibration reduction due to periods of non-operation
- Operates without vacuum valve
- Most precise vacuum level at all times

Fully automatic control with speed adjustment

```

RPM regulated pumps adjust their speed individually when the required vacuum level is reached
Valve-Regulated Vacuum Pumps

Standard vacuum pumps can be controlled manually or via valve operated vacuum controllers.

Rotavac Valve Tec

- Recommended for solvents with low or medium boiling points.
- Vacuum can be controlled via valve operated or manual vacuum controllers.

Rotavac Valve Control

- Suction capacity for up to three rotary evaporators at the same time.
- Vacuum can be controlled via valve operated or manual vacuum controllers.

Depending on your application you can switch on and off the vacuum pump via switchbox.
RPM-Regulated Vacuum Pumps

Controllable vacuum pumps for digital regulation of the vacuum via operation panel or directly at the unit (depending on version - see below)

Rotavac Vario Tec
P/N 591-00171-00
Condenser
P/N 591-00084-00

For Hel-VAP Precision

Two-stage

1.0

12

yes

150

4:3

156 / 256 / 566

Recommended for solvents with low or medium boiling points.

Rotavac Vario Control
P/N 591-00141-00
Condenser
P/N 591-00084-00

For Hel-VAP Precision

Three-stage

1.7

160

5:4

167 / 236 / 516

Even if the gas ballast valve is open an excellent ultimate vacuum is reached when working with easily condensable vapors. This makes distilling high boiling point solvents such as DMF or DMSO possible at low beth temperatures.

Rotavac Vario Pumping Unit
P/N 591-00142-00
Condenser
P/N 591-00084-00

Fully controllable stand-alone pumping unit including vacuum controller. For Hel-VAP Value and Hel-VAP Advantage

Three-stage

3

yes

150

8:6

133 / 260 / 299

Precise vacuum control avoids bumping and eliminates foaming of your evaporation solution.

Due to automatic vacuum supply to the process parameters you have more time for important laboratory activities.
Vacuum Accessories

Switchbox
Connect up to three rotary evaporators to one vacuum pump

Manual vacuum controller
For Hei-VAP Value and Hei-VAP Advantage

Vacuum valve
Required to control vacuum for Hei-VAP Precision models with valve-regulated pumps

Switchbox
P/N 569-00400-00
- Connect up to three rotary evaporators to one pump and control vacuum individually
- Pump switches off automatically at required vacuum
- Reduces energy consumption of pump
- Increases performance life of the pump due to a complete switch-off if vacuum is reached
- Vacuum valve and non-return valve are required for every evaporator if you work with different pressures at the same time
- Delivery includes three non-return valves
- Designed for Hei-VAP Precision
- Weight: 0.6 kg
- Dimensions: L80 / W80 / H45 mm

Manual vacuum controller
P/N 591-26000-00
- Control your house vacuum or any other vacuum source
- Pressure range from 0 to 1,020 mbar
- Scaling on display in steps of 50 mbar
- Connection for tubes with 8 mm inner diameter
- Support rod included
- A vacuum valve is not required
- Dimensions: L80 / W80 / H45 mm

Vacuum valve
P/N 569-00060-00
- External attachment design for easy cleaning
- Can be combined with the Woulff Bottle to one unit
- Not required if you utilize a Manual vacuum controller

Woulff bottle
P/N 569-00070-00
- Additional recovery of solvent to protect vacuum valve and vacuum pump
- Compatible with all Hei-VAP configurations
- Direct connection to the vacuum valve is possible
- Features connection to vacuum controller
- Volume of 250 ml
