Labworldsoft® 6 Pro

/// Data Sheet

Labworldsoft® 6 Pro lab software is unique on the market and the cockpit for your digital laboratory. With the Pro version, you have unrestricted access to all laboratory devices from our device library. If one of your laboratory devices is not yet included, we are offering to implement it for you. You therefore benefit from the full potential of labworldsoft® 6. On the PC, you are able to automate laboratory processes, store your own recipes and process flows or perform calculations during the experiment.

labworldsoft® 6 Pro at a glance

> Suitable for all device configurations

designed for scientists

- > Access to more than 700 devices from the device library
- > Any number of devices can be controlled at the same time
